

COMPANY PROFILE

living
parquets

Posiamo emozioni  Benvenuti a casa

www.livingparquets.it

“Artisans inside”
this is the motto that
accompanies every
creation by Living
Parquets, a company
specialized in the supply
and installation of
wood flooring.

Living Parquets, a young company founded in 2005 that focuses its attention on quality products, the result of a policy of constant selection and verification of the raw material, making use of exclusive partners leaders in the wood sector.

We have been operating for some time in the field of luxury contracts and in the naval and yacht sectors on national and international territory, collaborating with companies specialized in the interior finishing worldwide.

The artisan component is perceived in the way of organizing and addressing the needs of our customer, because a job well done is such only if it is reflected in customer satisfaction.

Precisely for this reason, supply and direct installation are the guarantee of a work done in a workmanlike manner, carried out directly by Living Parquets.

HEADQUARTER

Living Parquets' headquarter is the nerve center where everything is born and takes shape, the heart of the company.

Design and consultancy are two areas that must necessarily work in harmony in order to meet the customer's needs.

Living Parquets, through continuous research and through the combination of the uniqueness of wood and new technologies, offers an innovative and personalized product, specially customized.

Made in Italy is the seal of origin that distinguishes our products.

From the careful research of the raw material to the installation, to combine the aesthetic quality of the product with the technical excellence of our installers.

We can give guarantee of products totally conceived, designed and manufactured in Italy and exported all over the world.

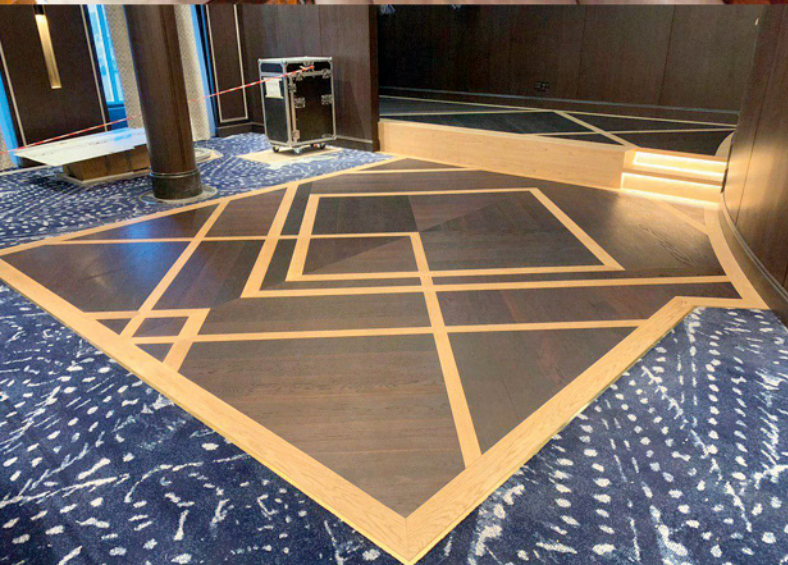

Living Parquets uses eco-compatible products and processes materials from certified and regulated sources with controlled reforestation and which comply with the rigorous environmental standards required.

All this testifies to the great respect and attention we reserve for the environment, nature and man.

The core of our philosophy is to enhance the nature of wood and protect the environment.
